14 Everything your pool could ever need.

POOL MAINTENANCE

23 Keep your pool spotless.

THE ALL-IN-ONE APP

24 Your pool in your pocket.

26 EXPERT SUPPORT

Your pool, in expert hands.

This is Norsup.

Your pool deserves the best. A crystal-clear pool, perfectly warm, always ready, without any hassle. That is exactly what Norsup delivers.

At Norsup, we believe your pool should bring nothing but pure joy. That is why we have built a complete ecosystem of premium pool equipment, engineered to work seamlessly together, so your pool takes care of itself and you simply enjoy it. Our technology is smart. Our products are built to last. And our approach puts your experience first, from the very first swim to every season that follows.

High quality pool equipment for a crystal-clear swimming pool

Norsup offers a complete range of innovative, premium swimming pool and water technology. Every product is carefully designed to work in perfect harmony with the rest of the system, so your pool always performs at its best.

Exclusively available through selected dealers

The Norsup range is exclusively available through carefully selected professional installers, trained to the highest standard in Norsup technology. These are specialists who understand the value of every component, enabling them to install, maintain and remotely monitor your pool with exceptional care.

Why NorsupOne?

6 Reasons to choose the NorsupOne.

1

One app. Complete control.

Adjust water temperature, check pH levels, control smart lighting or start your heat pump, all from the palm of your hand, wherever you are. One app, total convenience.

2

Energy savings you will actually notice.

The NorsupOne works with variable-speed pumps and a full inverter heat pump to use only the energy your pool genuinely needs. Surplus solar energy heats your pool automatically. The Zero-E concept puts every watt to work, your running costs drop, without any sacrifice in comfort.

3

Fewer chemicals, cleaner water.

Smart data analysis means chemicals are only dosed when truly needed. Combined with UV treatment and salt electrolysis, you use significantly fewer chemicals. Softer water, less chlorine smell, and a noticeably more comfortable swim for the whole family.

4

Maintenance that looks after itself.

The app tells you exactly when something needs attention, always before it becomes a problem. It can even notify your installer automatically, so service is arranged without you lifting a finger.

5

Professional installation and certified support.

Every Norsup installer is specially trained and certified, so your pool is installed and looked after to the highest standard. From your first swim to every season that follows, you are always in expert hands.

6

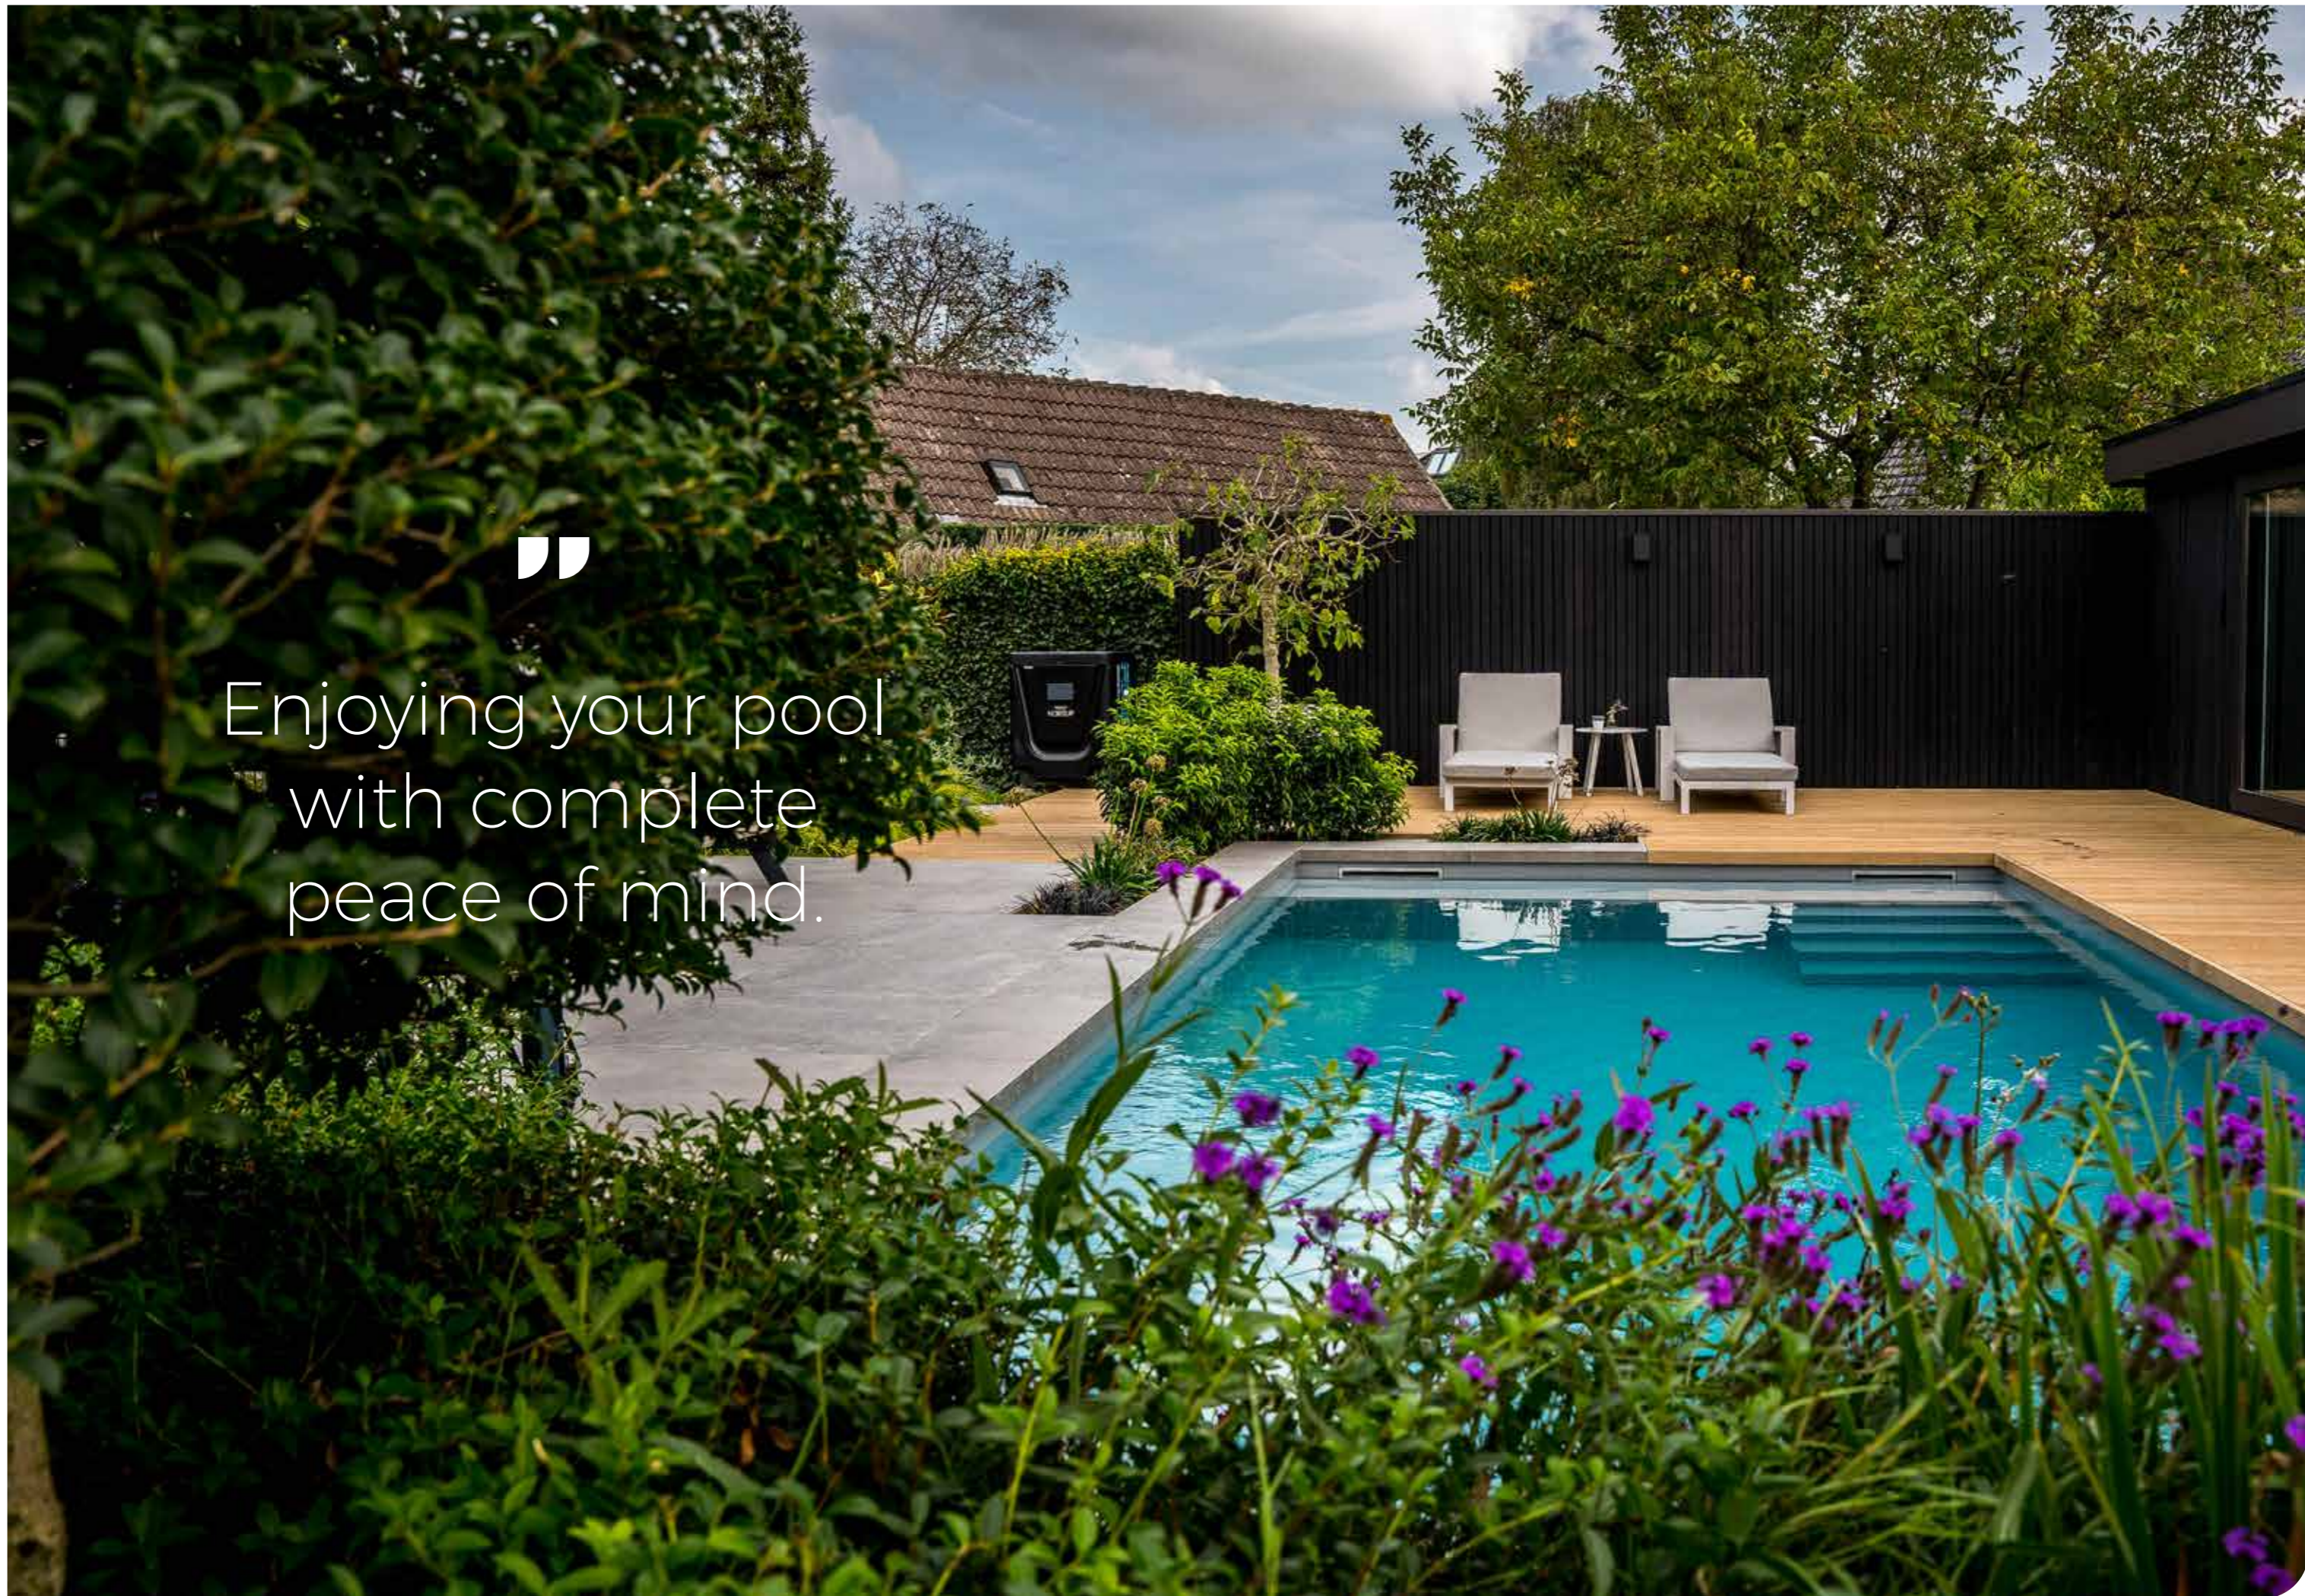

One brand. One complete range.

Every piece of Norsup equipment is designed to work perfectly with the rest, technically and aesthetically. One brand, one complete range, zero compromises.

”

Enjoying your pool
with complete
peace of mind.

Energy and sustainability

Eco-friendly devices.

At Norsup, we believe sustainable solutions should never mean a compromise on enjoyment.

Our technology is designed to save energy, reduce chemical use and conserve water. All while delivering a better swimming experience. Every component in the NorsupOne system contributes to a greener, more economical pool.

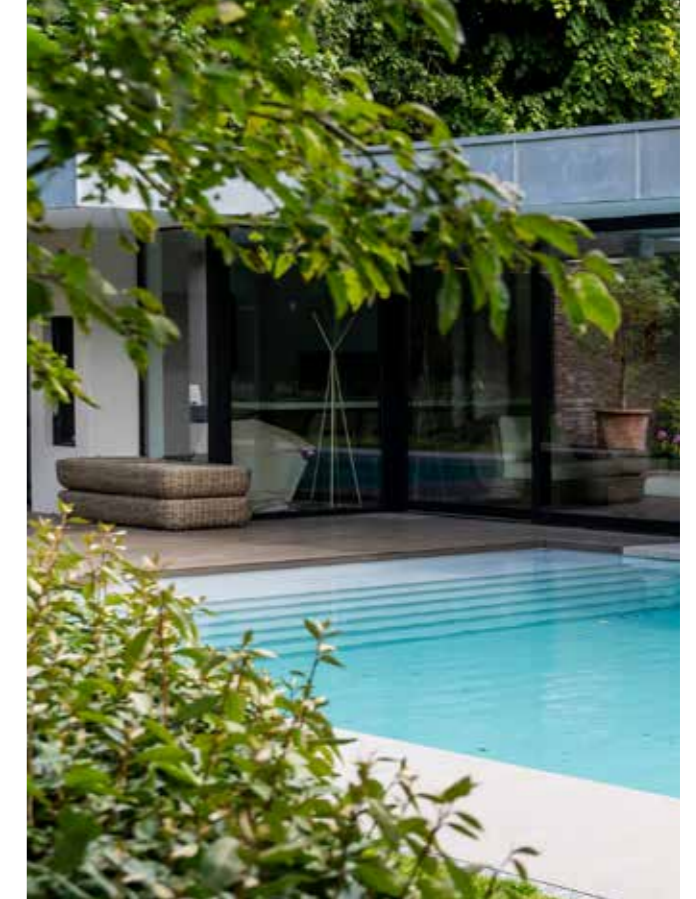

• Variable speed circulation pump

Unlike a traditional single-speed pump, the Norsup variable speed pump adjusts to run at precisely the flow rate your pool needs at any moment. The result is quieter operation, a longer pump lifespan, and dramatically lower energy consumption.

• Full inverter heat pump

Our full inverter heat pump adjusts its heating capacity from 10% to 100% depending on outdoor temperatures, delivering consistent warmth with a COP of up to 30, among the most energy-efficient in its class. SmartGrid technology allows it to work seamlessly with solar panels or future smart energy networks, so your pool benefits from clean energy whenever it is available.

• UV disinfection and salt electrolysis

The Norsup Supernova UV disinfection system and Norsup salt chlorinator both reduce the need for traditional chemicals by working with natural processes. Your water stays clean and clear with less intervention, better for your family, and better for the environment.

• NorsupOne controller: the smart heart of it all

The NorsupOne controller centrally monitors every device and ensures the whole system always runs in its most efficient and economical mode. Its accurate data analysis tells you exactly when to use disinfection products and when to replace consumable parts, preventing unnecessary waste and reducing long-term running costs. The Zero-E concept in the NorsupOne V3 utilises the excess capacity of solar panels for pool heating. Thanks to automatic backwashing and the use of rainwater, you save precious drinking water, supported by precise level monitoring.

Your sustainable solution.

Norsup's eco-friendly technologies are designed to make your pool last longer, cost less to run and sit lighter on the planet, so you can enjoy infinite pool enjoyment with a clear conscience.

Every component
in the NorsupOne
package is engineered
to work perfectly
alongside the others.

Complete
NorsupOne
package

Everything your pool
could ever need.

High quality products, where every swim feels like the first.

Every component in the NorsupOne package is engineered to work perfectly alongside the others. From the intelligent control unit and heat pump right through to the pool cover that keeps your water warm and the lighting that sets the mood after dark. Fast to install, effortless to maintain, and built to last.

The NorsupOne package contains the following:

- ① Control Unit
- ② Variable speed pool pumps
- ③ Full inverter heat pumps
- ④ UV disinfection systems
- ⑤ Sand or cartridge filters
- ⑥ Electrolyse, hydrolyse or automatic dosing systems
- ⑦ Pool light
- ⑧ Pool covers

Norsup can also fully tailor the package to suit your pool and lifestyle. Talk to your dealer about what is possible.

Immediate warnings and alarms

Both you and your installer receive instant notifications if anything unusual is detected in your pool, allowing issues to be resolved before they escalate. You can enjoy your pool with complete peace of mind.

1

Control Unit

NorsupOne v3 is the brain of your pool. This latest-generation controller brings complete automation to every aspect of your pool. From filtration and heating through to lighting and water treatment, all managed through one beautifully simple app.

- Complete automation and pool management
- Remote monitoring and control from anywhere in the world
- Instant error and alarm notifications to you and your installer
- Compatible with the entire Norsup range
- Automatic pool cover control with geofencing
- Automatic frost protection
- Garden lighting and accessory control
- Compatible with leading home automation systems

2

Variable speed pool pump

This intelligent pump adjusts its speed to match exactly what your pool needs at any moment. Integrated controls and programmable timer functions make it effortless to manage, while energy label A performance keeps running costs impressively low.

- Energy label A
- Silent running
- Timer and three speed settings
- Skimmer function for surface cleaning
- Salt water resistant

3

Full inverter heat pump

A warm pool waiting for you, whenever you want it. The Norsup full inverter heat pump varies its output continuously between 10% and 100%, reaching your ideal temperature quickly and holding it steadily with minimal energy. Barely audible in operation.

- Energy label A, COP up to 30
- Full inverter technology for maximum efficiency
- Silent running with low noise compressor and fan
- Green refrigerant R32 or R290
- Touchscreen and wireless control
- SmartGrid ready for solar and smart energy networks

New for 2026: AI driven ProX model heat pumps

Norsup is also introducing a new generation of AI-driven heat pumps that learn from your usage patterns and local weather data, delivering up to 30% more energy savings automatically. They include WiFi/4G connectivity.

4

UV disinfection systems

The Norsup Supernova uses ultraviolet light to neutralise bacteria and pathogens at the source, cutting chemical use by up to 80%. The high-performance Amalgam lamp delivers stronger, more stable output than a traditional UV-C lamp, season after season.

- Duplex stainless steel housing
- Suitable for all pool types
- Reduces chemical use significantly
- Amalgam lamp for stable, long-life performance
- LCD display and lamp replacement timer (timer upgrade)

Check all features here

The Norsup AOP – Advanced Oxidation Process, combines the benefits of ozone and UV-C into one device. It effectively oxidises the micro-pollutants in the water and thereby reduces any organic and inorganic pollution. The unit disinfects the water effectively, as well as de-activating any chlorine resistant organisms. The Norsup AOP is designed in a way that ensures all ozone in the water is used during the AOP process, therefore no de-ozonation device is needed.

- Triple disinfection: ozone, OH radicals and UV-C
- 9000 hours lifetime of the lamp for ozone and UV-C production
- A stand-alone electronic ballast to guarantee an efficient and stable power supply
- Up to 35% more UV-C yield thanks to reflection by its stainless steel reactor
- Duplex stainless-steel housing, suitable for use in chlorine and salt electrolysis pools

5

Sand or cartridge filter

Choose the filter that suits your pool best. Norsup sand filters offer decades of reliable performance in premium polypropylene or fibreglass reinforced polyester. Norsup cartridge filters require no backwashing, saving a significant amount of water every season.

- Sand filter: premium quality, up to 3.75 bar working pressure
- Upgrade to glass media for ultra-clear filtration to 5 microns
- Cartridge filter: no backwash required, water-saving design
- Easy cartridge cleaning with a standard garden hose
- Optional automatic backwash, connected to NorsupOne

Check all features here

6

Electrolyse, hydrolyse or automatic dosing system

Keep your water perfectly balanced. The Norsup electrolyse or hydrolyse system converts ordinary salt into natural chlorine. Or choose the automatic dosing system, which continuously monitors and adjusts pH and chlorine levels with precision.

- Hydrolyse system: 1.5g/l salt, 20g/h chlorine production
- Self-cleaning electrolysis cell
- Automatic winterising and pool opening/closing detection
- Dosing system: pH and redox probes, plug-and-play
- Boost mode and Low mode for cover operation
- Instant warnings to you and your installer if anything unusual is detected

7

Pool light, Veluna

As day becomes evening, Veluna transforms your pool into somewhere truly special. With an UltraFlat 2mm glass body and a unique clip connection, Veluna fits every pool type and is effortless to install and replace. Control millions of colour combinations or timeless warm white light directly from the NorsupOne controller or a separate controller.

- Veluna RGBW: 1,800 lumen at 25W, full colour range with millions of combinations
- Veluna Warm White: 2,500 lumen at 25W, 3,500K for a natural inviting tone
- UltraFlat 2mm glass body, flush with the pool wall
- Dimmable and fully controllable via the NorsupOne app
- Compatible with liner, tile, PP and PE pools
- Retrofit option for existing Par56 housings
- RS485 and DMX512 compatible for home automation integration

Pool covers: slatted covers and enclosures

A pool cover is not just protection, it is an upgrade to your entire pool experience. Norsup slatted covers roll back at the touch of a button or a tap in the app, keeping warmth in and debris out. Pool enclosures extend your swimming season well beyond summer. All covers are custom-made to fit your pool perfectly.

- Retains up to 80% of heat overnight, reducing heating costs significantly
- Solar heating effect of up to +4°C per day
- Automatic open and close via the NorsupOne app with geofencing
- Durable, UV-resistant interlocking slats
- Available as in-ground, deck-level or above-ground roller housing
- Slatted covers corrosion-free operation, composite shaft technology ensuring complete corrosion resistance
- Pool enclosures with aluminium frames and polycarbonate or glass panels
- Custom-made for your pool in a wide choice of colours and styles

Pool maintenance

Keep your pool spotless.

AquaRacer robot pool cleaner

The Norsup AquaRacer moves intelligently through your pool, scrubbing the floor, climbing the walls and cleaning the waterline in a single, uninterrupted cycle. AquaSmart navigation ensures complete coverage every time, while cartridge filtration to 5 microns captures even the finest particles.

- Cleans floor, walls and waterline in one complete cycle
- AquaSmart intelligent navigation for full pool coverage
- Cartridge filtration to 5 microns for fine particle capture
- Top-loading filter basket for easy, mess-free cleaning
- Schedule and monitor via the NorsupOne app
- Energy-efficient operation with low running costs
- Suitable for all pool types and surfaces
- Includes caddy for easy storage and transport

The Norsup AquaRacer is the perfect companion to the NorsupOne system.

A high-performance robotic pool cleaner that handles everything the system cannot do automatically. Drop it in. Walk away. Come back to a perfect pool.

The all-in-one app

Your pool in your pocket.

The NorsupOne app gives you complete mastery of your pool, whether you are at home in the garden or on the other side of the world. Total control. Total convenience. Your installer sets it up for you on day one, so there is nothing to figure out.

Everything you need, in one place

With the NorsupOne app you can monitor and manage every aspect of your pool through a single, beautifully simple interface. There is no need to check multiple devices or systems, your pool is always within easy reach.

- Set and adjust water temperature
- Monitor pH, salt and chlorine levels
- Control pump speed and filtration
- Switch smart lighting on or off
- View full performance history
- Receive instant alerts
- Notify your installer for maintenance
- Control the pool cover automatically

Easy maintenance

The NorsupOne app tells you when a device or component needs attention or replacement and can notify your installer directly to plan a service visit. That way, your pool is always performing at its best, and parts are only replaced when they genuinely need to be. Nothing wasted.
